Summary

B.Tech IT student with hands-on experience in Python FastAPI, machine learning, and cloud technologies. Built projects in AI/ML and web development, with five times competition wins. Seeking an Entry Level Job Opportunity to apply my skills.

Education

Rungta College of Engineering and Technology, Bhilai **2023 – 2027**
B.Tech in Information Technology | CGPA: **7.8**

Sarvodaya Public School, Chandrapur **2021 – 2022**
Senior Secondary (Class XII), CBSE | **75.2%**

Technical Skills

Languages	Python, Java
CS Fundamentals	DSA, DBMS, OS, Computer Networks
ML / AI	XGBoost, Scikit-learn, YOLOv11, OpenCV
Web / Backend	FastAPI, Flask, REST APIs, React, React Native, PostgreSQL, MQTT
Cloud / DevOps	GCP, Azure, Docker, GitHub Actions

Projects

Setu-Drishti — ICU Sepsis Early Warning System Live | GitHub
Python · XGBoost · FastAPI · React · GCP Cloud Run · Docker

- Developed an XGBoost-based clinical risk prediction pipeline using ICU data, with a focus on early sepsis risk identification and structured clinical features.
- Built a FastAPI inference backend and React dashboard, integrating model predictions into a clinician-facing workflow and containerizing the application for deployment.

JalMitra: Smart Irrigation App GitHub
FastAPI · React Native · PostgreSQL · MQTT · Gemini

- Built a React Native app and FastAPI backend that shows live farm sensor data and tells the farmer when to water, so they don't over-irrigate.
- Added pump control by button or by asking a Hindi/Hinglish Gemini chatbot that gets the live sensor readings in every prompt. The pump turns off by itself when watering is done. Runs over MQTT, tested with a hardware simulator.

SentinelX — Real-Time Threat Detection System YouTube | GitHub
Python · YOLOv11 · OpenCV · Flask · Docker · Telegram Bot API

- Built a YOLOv11-based system to detect potential threats in live video feeds using OpenCV.
- Integrated Flask and Telegram alerts to send detection snapshots and timestamps, with results shown on a web dashboard.
- Evaluated the model in controlled test scenarios, reporting an F1-score of 0.84 and mAP@0.5 of 0.82.

Certifications

- **Microsoft Certified: Azure Fundamentals (AZ-900)** **June 2025**
- **AWS Cloud Foundations** — EduSkills / AICTE **Oct – Dec 2025**

Achievements

- **1st Prize** — Google Cloud Hack Sprint (Mar 2026, 70+ teams) Powered By GeeksforGeeks 12-Hour Hackathon (2026); Setu-Drishti.
- **1st Prize** — College Project Competition (2025); SentinelX.
- **1st Prize** — Microsoft Agentic AI Hackathon and Microsoft Prompt Wars Arena, College Tech Fest (2026).
- **2nd Place, Best Paper Award** — Shaashtrarth International Conference (2025).

Positions of Responsibility

Student Coordinator — VIGAM 2026 Farewell Event **Jan 2026 – Apr 2026**

- Led the organising team for the seniors' farewell. We had a tight budget and no estimate of how many would attend, so food and gifts were a guess.
- Built a registration web app with ERP ID verification, separate seniors and juniors pages, and photo upload for personalised gift cups.
- Generated QR codes, emailed them to 500+ students with the Brevo API, and used them for gate check-in and attendance tracking. Live | GitHub
